

Custom & OEM

Our design team and in-house production facility are ready to integrate Solo technology into your existing subsea system or create a custom instrument package to suit your needs. Our catalog of existing IP and Solo OEM modular components reduces engineering costs and accelerates concept to delivery timelines. Solo OEM technology features industry standard communication protocols efficient power management for low power budgets and easily customizable software and user interfaces.

Features

Rechargeable
Li-ion Battery

Wifi Connectivity

Up To 11000
Meter Rated

12mp / 1080p
Image Sensor
